Index for Volume 17

JOURNAL OF MOTOR BEHAVIOR, 1985. Pages 1–128 can be found in March, Number 1; pages 129–264 in June, No. 2; pages 265–384 in September, No. 3; and pages 385–504 in December, No. 4.

Accommodation to Increased Accuracy Demands by the Right and Left Hands, Todor, J., & Cisneros, J., 355.

Achilles Tendon Reflexes and Surface EMG Activity During Anticipation of a Significant Event and Preparation for a Voluntary Movement, Scheirs, J. G. M., & Brunia, C. H. M., 96.

Agarwal, G., (*See Corcos*).

Age Differences on a Coincident Anticipation Task: Influence of Stereotypic or "Preferred" Movement Speed, Williams, K., 389.

Allard, F., (*See Patla, Frank*).

Al-Senawi, D., & Cooke, J. D., ***Matching of Movements Made Independently by the two Arms in Normal Humans,*** 321.

Analysis of Vertical Limb Displacements of the Center of Gravity in the Cat During Limb Flexion Induced by Cortical Stimulation, Y. Gahery, Ioffe, M. E., Frolov, A. A., & Coulmance, M., 463.

Bandura, A. (*See Carroll*).

Barnwell, G. M., (*See Stafford*).

Brown, S. H., (*See Cooke & Brown*).

Brunia, C. H. M., (*See Scheirs*).

Carlton, L. G., (*See Newell, K. M., & Carlton, L. G.*).

Carlton, L. G., (*See Carlton, M. J.*).

Carlton, M. G., Robertson, R. N., Carlton, L. G., & Newell, K. M., ***Response Timing Variability: Coherence of Kinematic and EMG Patterns,*** 301.

Carroll, W. R., & Bandura, A., ***Role of Timing of Visual Monitoring and Motor Rehearsal in Observational Learning of Action Patterns,*** 269.

Cisneros, J., (*See Heuer*).

Cooke, J. D., & Brown, S. H., ***Science and Statistics in Motor Physiology,*** 489.

Cooke, J. D., (*See Al-Senawi*).

Coulmance, M., (*See Gahery, Y.*).

Corcos, D., Agarwal, G., Gottlieb, G., ***A Note on Accepting the Null Hypothesis: Problems with Respect to the Mass-Spring and Pulse-Step Models of Movement Control,*** 481.

Fischman, M. G., & Schneider, T., ***Skill Level, Vision, and Proprioception in Simple One-Hand Catching,*** 219.

Fitts' Law In Two Dimensions with Hand and Head Movements, Jagacinski, R. J., & Monk, D. L., 77.

Frank, J. S. (*See Patla, Frank*).

Frekany, G. A., (*See Larish*).

Frolov, A. A., (*See Gahery*).

Gahery, Y., Ioffe, M. E., Frolov, A. A., & Coulmance, M., ***Analysis of Vertical Displacements of the Center of Gravity in the Cat During Limb Flexion Induced by Cortical Stimulation,*** 463.

Gielen, C. C. A. M., van den Oosten, K., & Pull ter Gunne, T., ***Relation Between EMG Activation Patterns and Kinematic Properties of Aimed Arm Movements,*** 421.

Gottlieb, G., (See Corcos).
The Growth of Stability: Postural Control from a Development Perspective, Shumway-Cook, A., & Woollacott, M. H., 131.
Hahn, R., (See Zelaznik).
Heuer, H., ***Intermanual Interactions During Simultaneous Execution and Programming of Finger Movements,*** 335.
Hulstijn, W., (See Mulder).
Influence of Practice Schedule on Testing Schema Theory, Predictions in Adults, Lee, T., Magill, R., & Weeks, D., 283.
International Interactions During Simultaneous Execution and Programming of Finger Movements, Heuer, H., 335.
Ioffe, M. E., (See Gahery).
Is "The Mass-Spring Model" a Testable Hypothesis?, Nichols, T. R., 499.
Jagacinski, R. J., & Monk, D. L., ***Fitts' Law in Two Dimensions with Hand and Head Movements,*** 77.
Kelso, J. A. S., (See Munhall).
Larish, D. D. & Frekany, G. A., ***Planning and Preparing Expected and Unexpected Movements: Reexamining the Relationship of Arm, Direction, and Extent of Movement,*** 168.
Lee, T., Magill, R., & Weeks, D., ***Influence of Practice Schedule on Testing Schema Theory Predictions in Adults,*** 283.
Magill, R., (See Lee).
Matching of Movements Made Independently by the Two Arms in Normal Humans, Al-Senawi, D., & Cooke, J. D., 321.
Mathematical Models of Central Pattern Generators in Locomotion: I. ***Current Problems,*** II. ***Single Limb Models for Locomotion in the Cat,*** III. ***Interlimb Model for the Cat,*** Stafford, F. S., & Barnwell, G. M., 3, 27, 60.
Mather, J., ***Some Aspects of Motor Organization of the Oculomotor System,*** 373.
McFarland, D. H., (See Smith).
Michaels, C. F., ***A Note on the Natural Basis of Action Categories: The Catching Distance of Mantids,*** 255.
Monk, D. L., (See Jagacinski).
Moore, C. A., (See Smith).
Mulder, T., ***Sensory Feedback in the Learning of a Novel Motor Task,*** 110.
Munhall, K. G., ***The Role of Similarity Analysis in Understanding Movement,*** 493.
Newell, K. M., (See Carlton, M. J.).
Newell, K. M., ***On the Relationship Between Peak Force and Peak Force Variability in Isometric Tasks,*** 230.
Nichols, T. R., ***Is "The Mass-Spring Model" a Testable Hypothesis?,*** 499.
A Note on the Natural Basis of Action Categories: The Catching Distance of Mantids, Michaels, C. F., Prindle, S., & Turvey, M. T., 255.
A Note on the Null Hypothesis: Problems with respect to the Mass-Spring and Pulse-Step Models of Movement Control, Corcós, D., Agarwal, G., & Gottlieb, G., 481.
On the Relationship Between Peak Force and Peak Force Variability in Isometric Tasks, Newell, K. M., 230.
Oosten, K. van den, (See Gielen).
Patla, A. E. ***Some Characteristics of EMG Patterns During Locomotion: Implications for the Locomotor Control Process,*** 443.
Patla, A. E. ***Speed-Accuracy Characteristics of Saccadic Eye Movements,*** 411.
Planning and Preparing Expected and Unexpected Movements: Reexamining the Relationship of Arm, Direction, and Extent of Movement, Larish, D. D., & Frekany, G., 168.
Prindle, S., (See Michaels).
Pull ter Gunne, T., (See Gielen).
Reaction Time Methods in the Study

of Motor Programming: The Procuing of Hand, Digit, and Duration, Zelaznik, H. N., & Hahn, R., 190.
Reflex Responses of Human Lip Muscles to Mechanical Stimulation During Speech, Smith, A., Moore, C. A., McFarland, D. H., Weber, C. M., 148.
Relation Between EMG Activation Patterns and Kinematic Properties of Aimed Arm Movements, Gielen, C. C. A. M., Oosten, K. van den, & Pull ter Gunne, T., 421.
Reproducing the End Location of a Positioning Movement: The Long and the Short of It, Wrisberg, C. A., & Winter, T. P., 242.
Response Timing Variability: Coherence of Kinematic and EMG Patterns, Carlton, M. J., Robertson, R. N., Carlton, L. G., & Newell, K. M., 301.
Robertson, R. N., (See Carlton, M. J.).
The Role of Similarity Analysis in Understanding Movement, Munhall, K. G., & Kelso, J. A. S., 493.
Role of Timing of Visual Monitoring and Motor Rehearsal in Observational Learning of Action Patterns, Carroll, W. R., & Bandura, A., 269.
Scheirs, J. G. M., ***Achilles Tendon Reflexes and Surface EMG Activity During Anticipation of a Significant Event and Preparation for a Voluntary Movement,*** Scheirs, J. G. M., & C. H. M. Brunia, 96.
Schneider, T., (See Fischman).
Science and Statistics in Motor Physiology, Cooke, J. D., & Brown, S. H., 489.
Sensory Feedback in the Learning of a Novel Motor Task, Mulder, T., & Hulstijn, W., 110.
Shumway-Cook, A., ***The Growth of Stability: Postural Control from a Developmental Perspective,*** 131.
Skill Level, Vision, and Proprioception in Simple One-Hand Catching, Fischman, M., & Schneider, T., 219.
Smith, A., ***Reflex Responses of Human Lip Muscles to Mechanical Stimulation During Speech,*** 148.
Some Aspects of Motor Organization of the Oculomotor System, Mather, J., 373.
Some Characteristics of EMG Patterns During Locomotion: Implications for the Locomotor Control Process, Patla, A. E., 443.
Speed-Accuracy Characteristics of Saccadic Eye Movements, Patla, A. A. E., Frank, J. S., Allard, F., & Thomas, E., 411.
Stafford, F. S., ***Mathematical Models of Central Pattern Generators in Locomotion:*** I. ***Current Problems,*** II. ***Single Limb Models for Locomotion in the Cat,*** III. ***Interlimb Model for the Cat,*** 3, 27, 60.
Thomas, E., (See Patla, Frank).
Todor, J., ***Accommodation to Increased Accuracy Demands by the Right and Left Hands,*** 355.
Turvey, M. T., (See Michaels, C. F.).
Weber, M., (See Smith).
Winter, T., (See Wrisberg).
Wrisberg, C. A., ***Reproducing the End Location of a Positioning Movement: The Long and the Short of It,*** 242.
Woollacott, M. H., (See Shumway-Cook).
Zelaznik, H. N., ***Reaction Time Methods in the Study of Motor Programming: The Precuing of Hand, Digit, and Duration,*** 190.
